## EXPERIENCE

---

### Jr Software Developer

August 2025 – Present

*Gist Applications*

*Victoria, BC, Canada*

- Built a multi-address order system using React, TypeScript, Javascript, and PHP for bulk CSV uploads of 100+ shipping addresses for a corporate gifting app feature
- Implemented a Redis background queue in PHP with a leaky bucket algorithm to safely handle Shopify API rate limiting in the backend
- Working with the customer support team to build custom Shopify integrations, and custom frontend development using Liquid, JavaScript, and CSS for enterprise clients.

### Family Office Intern

April 2025 – August 2025

*Folly Partners*

*Victoria, BC, Canada*

- Built AI automations to streamline email, calendar management, and social media workflows for executive operations via Andrew Wilkinson
- Developed custom MCP (Model Context Protocol) servers using TypeScript for legal case law retrieval (open source) and social media search functionality for 11,000+ tweets
- Co-facilitated a Lindy AI BootCamp event, coaching participants on building AI-powered automations helping Founders to Executives in thier Lindy workflow

### Hackathon Organizer

January 2025 – Present

*Freelance*

*Victoria, BC, Canada*

- Organized and executed a Cursor Hackathon attracting 100+ attendees from the local tech community
- Led Scrapyard Victoria, a 12-hour high school hackathon, successfully raising over \$2,000 in sponsorships and engaging young developers in hands-on coding experiences
- Organized Cafe Cursor workshop event for Victoria Tech Week, partnering with Cursor AI and coordinating venue logistics

## PROJECTS

---

### PhotoBomb | Rust, Typescript, React Native, Expo, AWS Lambda, S3

Present

- Developed a multiplayer mobile party game where friends challenge each other to take themed photos in real-time
- Built Rust backend with AWS Lambda and S3 to scale photo processing and storage for multiple concurrent games
- Implemented real-time data synchronization using Expo and React Native for seamless multiplayer experience

### CanLII MCP | TypeScript, Cloudflare Workers, CanLii API, MCP Protocol

2025

- Built a Model Context Protocol server for Canadian legal research integrating with CanLii database
- Deployed on Cloudflare Workers for fast global access to Canadian case law and statutes
- Enabled AI assistants to perform seamless legal research with robust API integrations

### DockBot | Python, GCP, Railway, Vertex AI, Gemini Pro

2024

- Created AI chatbot in Slack for theDock co-working space using (RAG) retrieval augmented generation
- Processed PDF documents with Google Document AI and chunked text for embeddings using Vertex AI
- Implemented vector database using pandas DataFrame with dot product search for relevant chunks

## EDUCATION

---

### University of Victoria

Victoria, BC

*Accelerated Entry Program*

*May 2023 – April 2025*

- Completed first year Computer Science & Astronomy courses in Grades 10-12

## TECHNICAL SKILLS

---

**Languages:** Typescript, Python, SQL (Postgres), JavaScript, HTML/CSS, Rust, SwiftUI

**Frameworks:** React, Node.js, Flask, React Native,

**Developer Tools:** Git, Docker, AWS, Google Cloud Platform, Cursor, Claude Code, Clash Royale, Bun

**Libraries:** pandas, NumPy, Matplotlib
